

## OriginalRack

**OriginalRack is a wire rack that helps to protect crops against falling and blowing over. This model has slightly outward curved sides and can be stacked. This model is also suitable for internal transport, to move the plants with a forklift.**

- OriginalRack is a stand-alone wire rack and is made to order.
- It is very stackable.
- The two wires at the bottom increase the stiffness of this model.
- The finishing of the bottom of OriginalRack makes it safe to use on ground cloth.
- OriginalRack is fast and easy to position, and it can easily be re-stacked on the pallet.
- OriginalRack can be made for any pot type and model.
- The model OriginalRack is very suitable for moving plants with a forklift. Small spacers can be created between certain plant sections so the forks of the forklift can fit in between.
